EXPERIENCE

The Brown Daily Herald, Inc., Providence, RI — Data Desk Head

Analyst: September-November 2024, Head: December 2024-Present

Lead a team of 20 analysts in analyzing data and creating articles and websites using Python, JavaScript, and HTML. Build [interactive web dashboards](#) displaying results from student polls. Analyzed [changes in word frequencies](#) in Herald articles from 1891 to the present using the Herald's digitized archive. Published interactive articles simulating [Ivy Madness playoff scenarios](#) and analyzing the student [housing selection](#) process.

Heatmap News, New York, NY — Paid Intern

February 2025-June 2025

Collected data on renewable energy policies by calling county officials across the country, asking about local zoning ordinances and contested solar and wind projects, and logging this data.

24cast.org, Providence, RI — Decision Desk Developer

October 2024-November 2024

Interviewed on election night as part of 24cast's live webcast (sponsored by the Brown Political Review), and worked to predict election outcomes and to call races quickly and accurately with a focus on Wisconsin.

Camp Ramah, Conover, WI — Sleepaway Camp Counselor June 2023, June-August of 2024 and 2025

Volunteer Research Assistant, Madison, WI

September 2023 - March 2024

Conducted statistical analyses of language use patterns in novels over time with Professor Angela Duckworth at University of Pennsylvania. Wrote and tested code for a machine learning research project focused on graphical neural networks with Professor Ramya Vinayak at University of Wisconsin-Madison.
